Projects

GLS FCAIT website (Mini Project)

2023-current

- Django, Python, HTML, CSS, JavaScript, SQL Lite
- Team Size:5
- In this project the task is to create the entire website for GLS FCAIT Department with admin for dynamic page creation and content management of the website.
- We are currently working on this project, In this project **my main role is to deal with full frontend part of the project both main site and the admin Panel.**
- **Secondary role was to find solutions where the team gets stuck or needs helping hand.**

Chatbot for GLS FCAIT (Summer Project)

3/2023 - 4/2023

- Flask framework, Python, HTML, CSS, JavaScript, MySQL
- Team Size:5
- Made Chatbot using Python in Flask, for ease of interaction between students and the admission office.
- The aim was to create a chatbot that can answer admission related query from students/users.
- In this project, while there were no specific tasks assigned, the team collectively worked on various smaller components. I also actively contributed to the frontend development including login, registration, and admin panel features, among other responsibilities.

Blood Bank Management System(BCA Project)

2021-2021

- HTML, CSS, MySQL, PHP
- Team Size:2
- As a team of 2, we divided the work into the frontend part and data fetching part from the database.
- **My role was to manage the frontend part.**

Am I a good fit for your team?

Let's make it official! >
